

J3400 Healthcare

THE POWERFUL, LIGHTWEIGHT J3400 TABLET PC

Introducing the rugged, high performance J3400 Tablet PC powered by the Intel® Core™2 Duo processor. Designed for medical professionals who are on the move, this robust, lightweight mobile device can handle the harshest hospital or medical clinic conditions without the worry of damage or downtime. Whether you are receiving patients in the ER, making house calls or checking patient records the J3400 enhances your productivity by enabling you to take technology directly to the point of care.

At only 1.63 kg*, the J3400 shines with the industry's brightest display. With the unique combination of Motion's View Anywhere® technology and the Hydix AFFS+ LED Backlight wide screen display, Motion offers the best display on the market with superior readability in any environment. And with the dual hot-swappable battery design offering up to a full day of battery life**, this tablet PC is ready to take on extra shifts.

Easily adaptable and built tough to withstand fast paced hospital environments the rugged J3400 is tested to MIL-STD 810-F specifications and designed to withstand a .91 meter drop. The J3400 is moisture and dust resistant, and built with rubberized edges and port covers that provide added durability. The slip-free surface allows for an easier grip so you can prevent drops before they happen.

Sign forms and update patient data right on the tablet.

Take your J3400 with you no matter where your work takes you.

IT'S LOADED AND EXTREMELY POWERFUL

The J3400 is packed with the latest in mobile technology, plus it has all the standard capabilities you have come to expect from a portable computing device. And with Motion QuickNav, you can easily launch frequently used applications, the camera or voice functionality with a touch of a button.

The J3400 features always-connected wireless WiFi 802.11 a/b/g/n and mobile broadband capabilities. Record and send patient data in real-time with Motion VoiceNotes or use its other flexible input capabilities including pen and keyboard to stay connected anytime, anywhere.

When you are documenting injuries, updating records or interviewing a patient during a home visit, take pictures with the J3400's built-in 2.0MP camera and flash, and with the geo-tagging and date stamping features you can document location and proof of work instantly.

Powerful, Rugged Mobile Computing at the Point of Care

It's INTUITIVE AND ADAPTABLE

The J3400 Tablet PC easily adapts to your work environment. Carry the J3400 with you all day and capture information instantly. Recording patient information offsite? Send photos and notes back to your home health agency in real-time from anywhere. And once you return to your office, place the J3400 in the FlexDock docking station for a high performance desktop experience or attach the Mobile Keyboard for quick and easy use while in a mobile desktop environment.

It's HIGHLY SECURE AND VERSATILE

The J3400 has a number of security features that offer the latest advancements to protect your system. To ensure that only authorized users access the sensitive data on your tablet PC, use the biometric fingerprint reader to login instantly. In case of a sudden drop, the integrated DataGuard™ shock sensor stops your hard drive, protecting your data and allowing for data file recovery. When a higher level of protection is needed, choose the optional Solid State Drive (SSD) to provide extreme shock and vibration protection. And the embedded Trusted Platform Module (TPM) offers higher security than software solutions alone by enabling hardware-based encryption.

Top: Retrieve and update patient data without leaving the room.

ACCESSORIZE YOUR SOLUTION TO MEET EVERY NEED

FlexDock Docking Station

This sleek docking station has a battery charger bay and four USB, DVI-D, Ethernet, audio and display. It can be directly mounted to VESA compatible devices, or used as a desktop replacement.

Battery Charger

An external bay to charge additional batteries. The charger's small footprint saves valuable desk space while the LED indicates battery charge status. Rapidly charge additional batteries within 2 hours.

*Additional batteries sold separately

Mobile Keyboard

The durable J3400 Mobile Keyboard is cable-less, reliable and extremely light at less than .45 kg. Magnetically attach it to the back of the J3400 for easy transport.

Shoulder Strap

For a safe and easy way to carry your J3400, add a shoulder strap to your tablet PC.

*Weight represents approximate system weight measured with one battery, no Bluetooth, no smart card bay, no express card bay, no camera, no WWAN, wide screen display, WLAN and no pen. Actual system weight may vary depending on component and manufacturing variability.

**All day battery life based on 8 hour work day. Battery life is dependent on actual wireless radio usage and user-defined power settings.
